Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 11-18, drawn to a scanning method, classified in class 359, subclass 204.
- II. Claims 19-28, drawn to a method of scanning, classified in class 250, subclass 234.

Claims 1-10 will be examined along with invention I, if elected.

The inventions are distinct, each from the other because of the following reasons:

Each of the Inventions I and II defines a patentably distinct method which requires different method steps. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the fields of search are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
